Handheld Computers in Schools and Media Centers

Ann Bell

1 VOLUME

This resource guides educators through the process of selecting the hardware and software for students to use handheld computers necessary to listen to eBooks, to research websites, and to use videos and audio books. The author's purpose is to help educators teach students to use handheld computers to learn the curriculum and meet national standards. By using these portable technologies in the classroom, students will increase their achievement, deepen their learning, and enrich their educational environment.
